

# How to change the cut off date

Category: Settings and Preferences

Published: Feb 02, 2026

Reading Time: 1 min

The **cut-off date** determines when your fundraising will officially end.

After this date, your page will no longer accept donations.

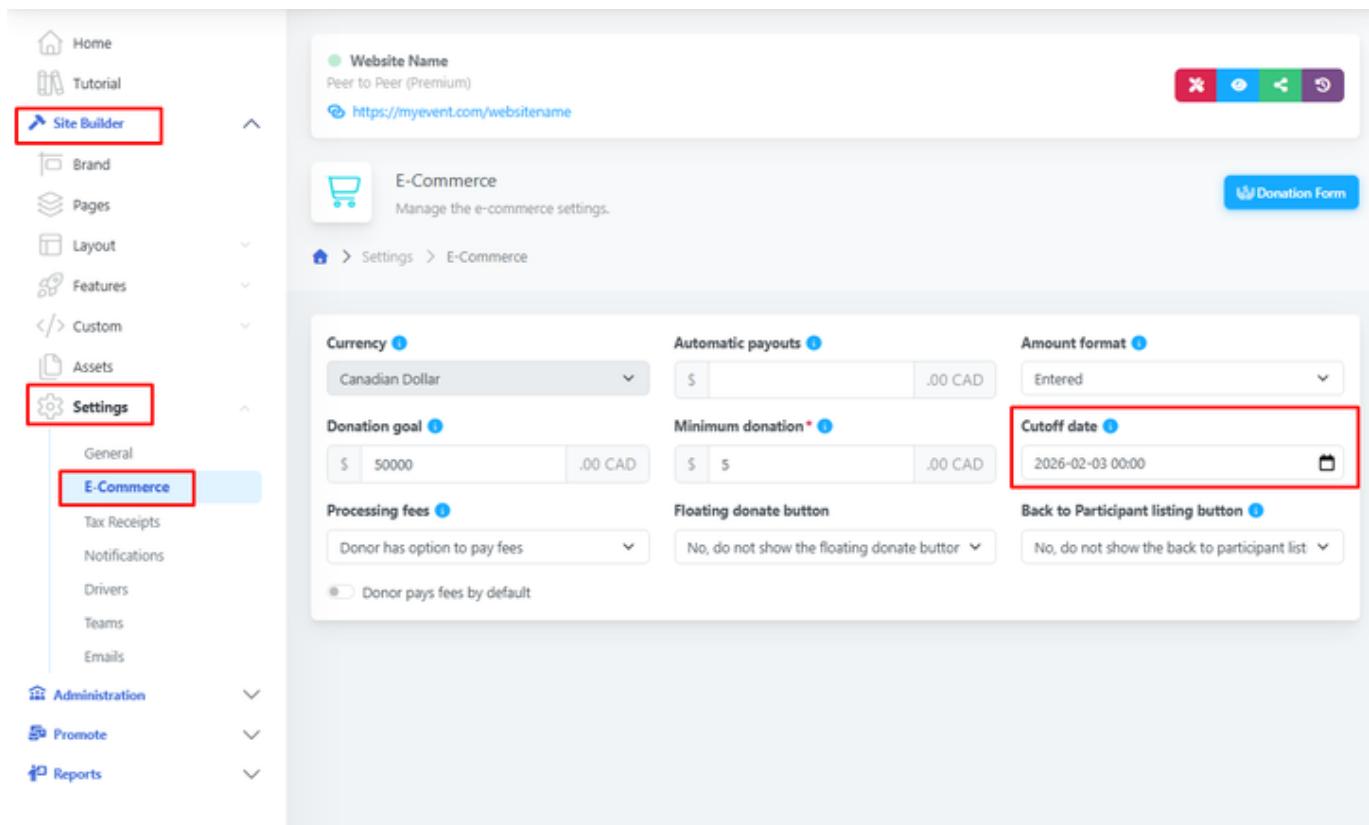

1. To set or update the cut-off date, go to **Site Builder**.

2. Navigate to **Settings**.

3. Select **E-Commerce**.

4. Set your desired **Cut-off Date**.

Once saved, donations will automatically stop after the selected date.

The screenshot shows the Site Builder interface with the E-Commerce settings page open. The left sidebar is visible with various sections like Site Builder, Settings, and E-Commerce. The E-Commerce section is currently selected. The main page displays E-Commerce settings including Currency (Canadian Dollar), Automatic payouts, Amount format (Entered), Donation goal (\$ 50000), Minimum donation (\$ 5), Processing fees (Donor has option to pay fees), Floating donate button (No, do not show the floating donate button), and Cutoff date (2026-02-03 00:00). The Cutoff date field is highlighted with a red box.
