

Creating Your First Pages

Category: Website Building

Published: Feb 03, 2026

Reading Time: 1 min

Before creating pages, it's important to understand that the number of pages you can create **depends on the package you have**.

Step 1: Review your package

Each package comes with a specific page limit. If you are on a  **Premium package**, you'll have access to create **more pages** compared to other plans.

Step 2: Access the Pages section

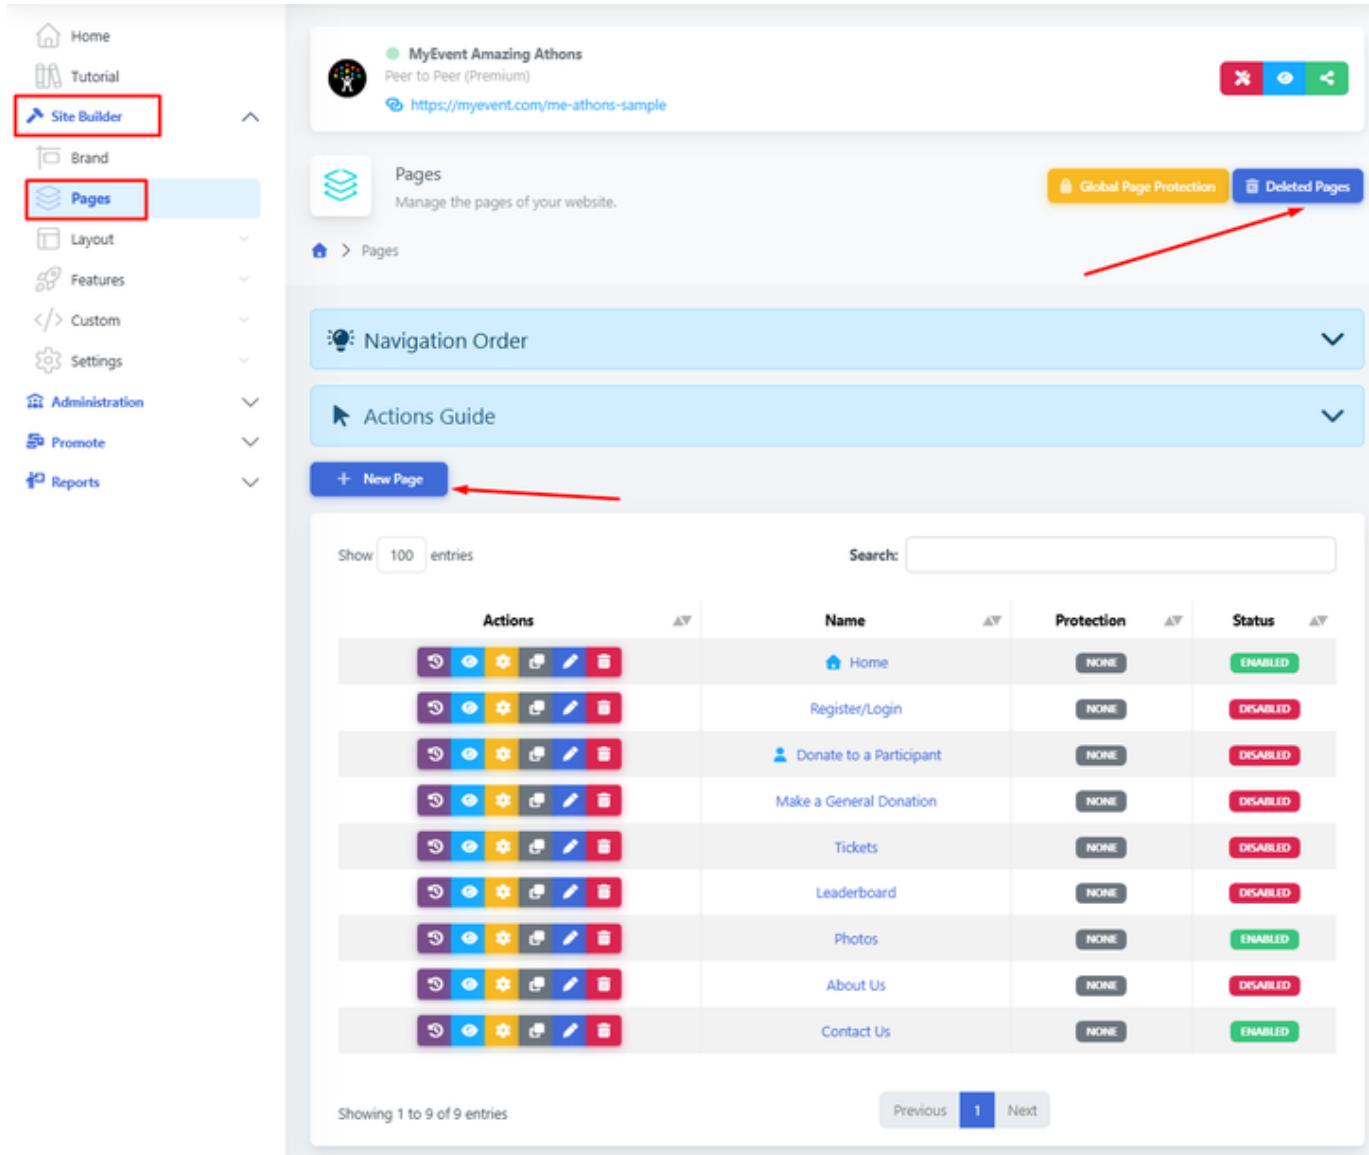

Go to **Site Builder > Pages**.

Step 3: Create a new page

Click on **New Page** to create a page, making sure you stay within the page limit allowed by your package.

Step 4 (Optional): Recover a deleted page

If a page was deleted by mistake, click on **Deleted Pages** on the right side to restore the page along with all of its content.

The screenshot shows the 'Pages' section of the MyEvent software. The left sidebar has 'Pages' selected. The main area shows a list of pages with columns for Actions, Name, Protection, and Status. The 'Actions' column contains icons for edit, delete, and other page-related functions. The 'Name' column lists pages like 'Home', 'Register/Login', 'Donate to a Participant', etc. The 'Protection' column shows 'NONE' for most pages, except 'Photos' which is 'ENABLED'. The 'Status' column shows 'ENABLED' for most pages, except 'Register/Login', 'Donate to a Participant', 'Make a General Donation', 'Leaderboard', and 'About Us' which are 'DISABLED'. A red arrow points to the 'Deleted Pages' button in the top right corner of the page list. Another red arrow points to the '+ New Page' button in the middle left of the page list.

Actions	Name	Protection	Status
	Home	NONE	ENABLED
	Register/Login	NONE	DISABLED
	Donate to a Participant	NONE	DISABLED
	Make a General Donation	NONE	DISABLED
	Tickets	NONE	DISABLED
	Leaderboard	NONE	DISABLED
	Photos	ENABLED	ENABLED
	About Us	NONE	DISABLED
	Contact Us	NONE	ENABLED

In the creation form, insert the title of your new page and the URI, which is the url of the page.

If you would like to disable the page and hide it from the public, you can click in Status and select Enabled or Disabled.
