Editing the Header Menu Text (e.g., "Tickets" to "Register" / "Enregister")

Yes, you **can** change the navigation/header menu text, including replacing the word "Tickets" with "Register" in English and "Enregister" in French.
Here's how you can do it:

- **Go to:** `Site Builder > Pages`
- Click the yellow gear icon beside the page you would like to retitle to open **Settings**
- In the Settings area, you can **rename** your page title and then click Confirm. This will adjust its title in your sites menu.
