Need to cancel a broadcast email before it's sent?

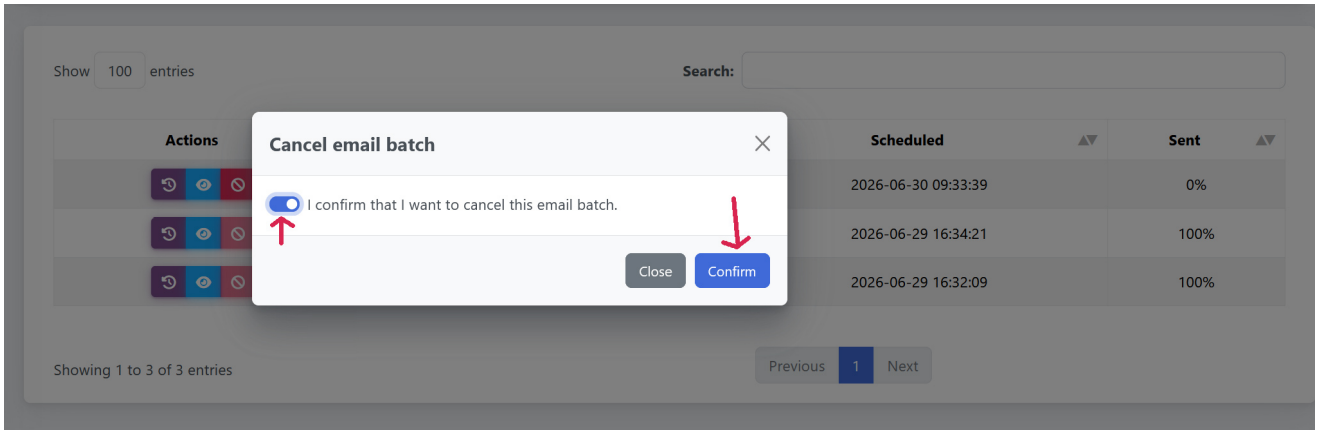

No worries!

You have a **10-minute window** to stop it before it goes out.

→ Log in to your dashboard, and go to Promote -> **Broadcast Emails**
→ Locate the email in the **queue**.
→ Click **Cancel**, the button will only be active **before the email batch is sent**

Click in the **confirm** toggle to cancel the email batch.

Once canceled, the email will appear **with a strikethrough** in the list.
