You have the freedom to add your own!

The recommended image size for a desktop banner is 1920 wide x 480px high, and the recommended image size for a mobile banner is 768 wide x 768px high.

To customize your banner, visit **Site Builder > Layout > Banner**

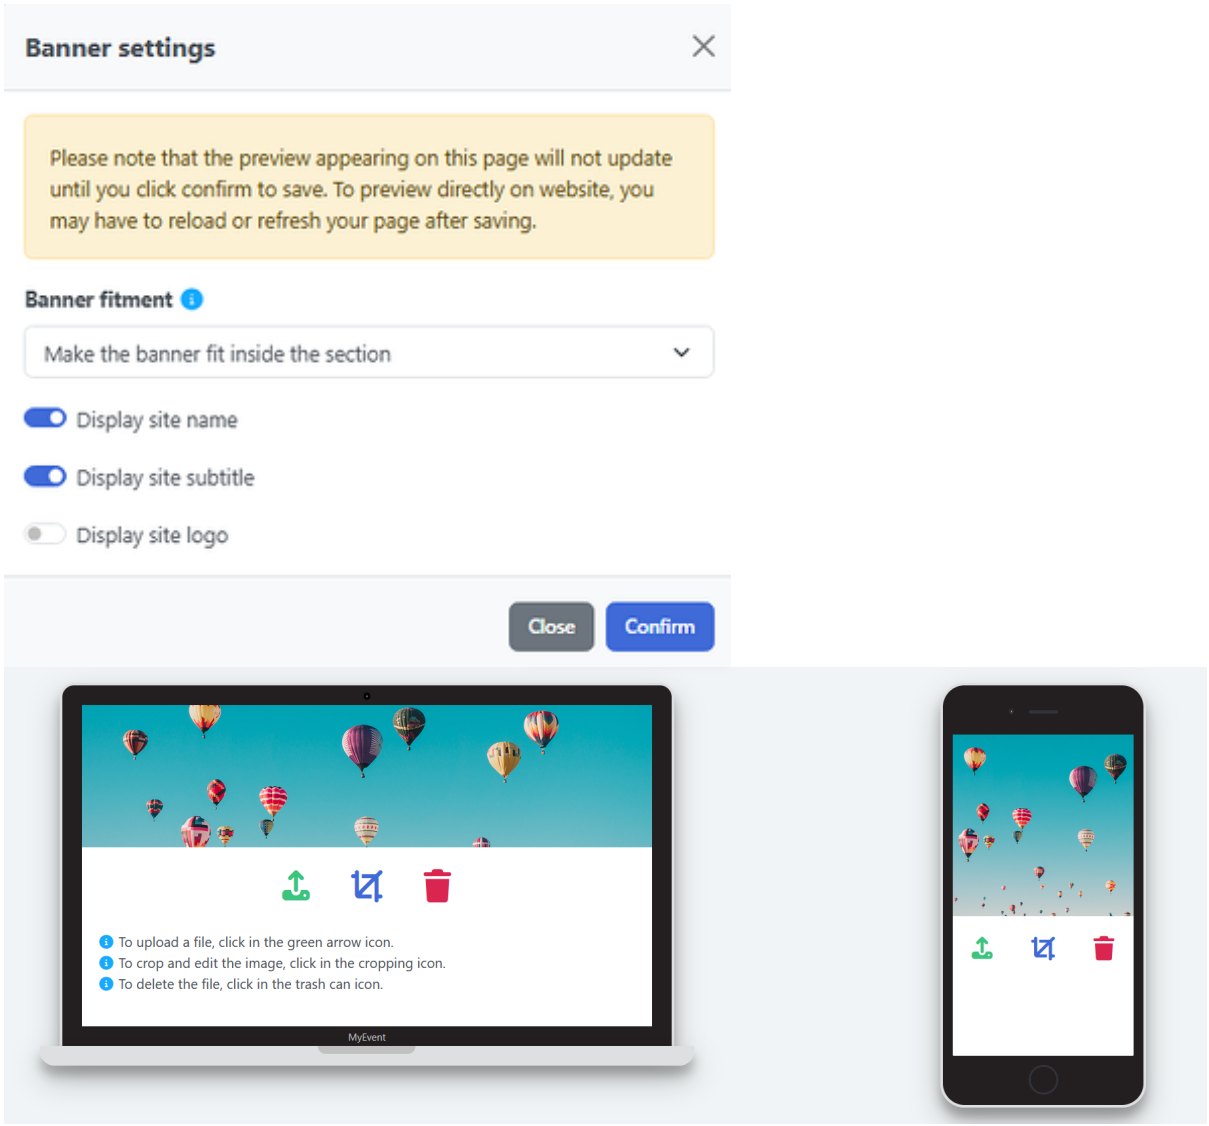

We have a few pre-made banners with multiple categories!

In Settings, you will find the 3 options available. These are the first you will verify after checking the banners.

The Site Logo can be added by visiting **Site Builder > Brand**; this one cannot be used at the same time as the titles.

The title and subtitle are also available to be changed on **Site Builder > Brand**.

After selecting the banner for both Desktop and Mobile, this is how they would look on the banner page.

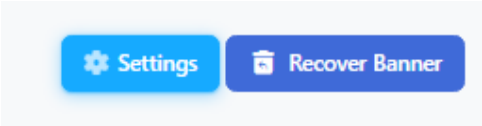

When you visit the website, they will be shown as follows.

& 

POV of the Desktop banner and Mobile Banner

If you accidentally delete a banner, do not worry; you are able to recover it via the Recover Banner option.

Once you select Recover Banner, it will display the options you have deleted in the past.
