

How to Create a Ticket

Category: Website Building

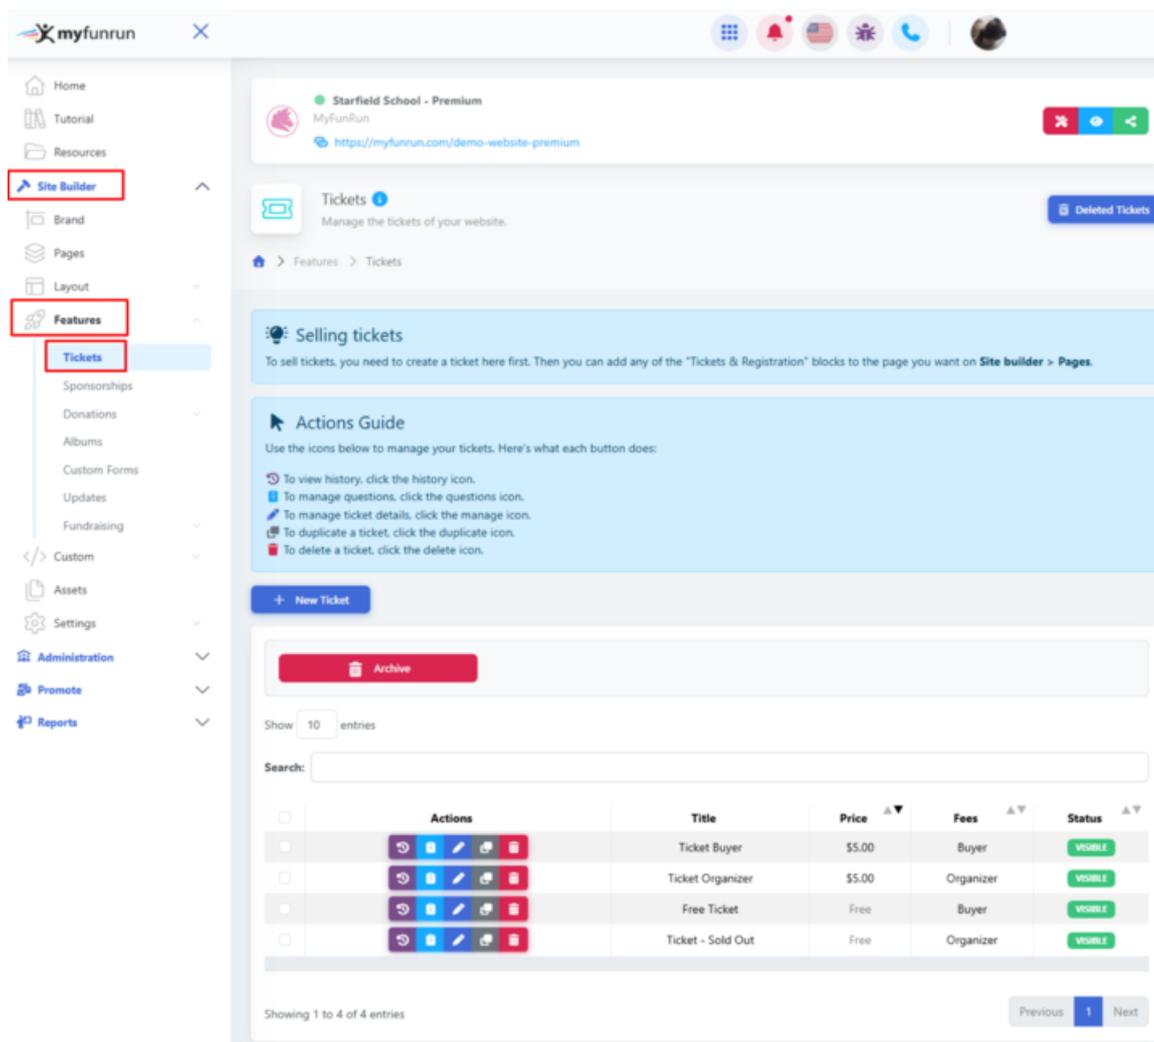

Published: Oct 30, 2025

Reading Time: 3 min

Tickets are the foundation of your event registration. Follow these steps to create a ticket for your event.

Step 1: Navigate to Your Tickets

From your dashboard, go to the **Site Builder** → **Features** → **Tickets**.

The screenshot shows the MyFunRun dashboard interface. On the left sidebar, the navigation menu includes: Home, Tutorial, Resources, Site Builder (highlighted with a red box), Brand, Pages, Layout, Features (highlighted with a red box), and Tickets (highlighted with a red box). Under Features, there are sub-items: Sponsorships, Donations, Albums, Custom Forms, Updates, Fundraising, Custom, Assets, Settings, Administration, Promote, and Reports. The main content area is titled 'Tickets' and contains an 'Actions Guide' section with the following instructions:

- To view history, click the history icon.
- To manage questions, click the questions icon.
- To manage ticket details, click the manage icon.
- To duplicate a ticket, click the duplicate icon.
- To delete a ticket, click the delete icon.

Below the guide is a '+ New Ticket' button and an 'Archive' button. A search bar is present with the text 'Show 10 entries'. A table displays the following data:

	Actions	Title	Price	Fees	Status
<input type="checkbox"/>	    	Ticket Buyer	\$5.00	Buyer	VISIBLE
<input type="checkbox"/>	    	Ticket Organizer	\$5.00	Organizer	VISIBLE
<input type="checkbox"/>	    	Free Ticket	Free	Buyer	VISIBLE
<input type="checkbox"/>	    	Ticket - Sold Out	Free	Organizer	VISIBLE

At the bottom, it says 'Showing 1 to 4 of 4 entries' and has 'Previous' and 'Next' navigation buttons.

Step 2: Click 'Create New Ticket'

Click the '+ New Ticket' button to open the ticket creation form.

The screenshot shows the 'Create' ticket form in the MyFunRun interface. At the top, the user is logged in as 'Starfield School - Premium' with the URL 'https://myfunrun.com/demo-website-premium'. The main heading is 'Create' with the subtext 'Create a ticket.' and a breadcrumb trail: 'Features > Tickets > Create'. A blue notification bar states: 'Your timezone is currently set to America/Toronto. Click here to change your time zone.' The form is organized into several sections:

- Status:** A dropdown menu set to 'Enabled'.
- Title:** A required text input field.
- Subtitle:** A text input field.
- Type:** A dropdown menu set to 'Tickets'.
- Ticket privacy:** A dropdown menu set to 'Buyer has option to choose'.
- Fees:** A dropdown menu set to 'Organizer'.
- Price:** A currency selector set to '\$' with the value 'Free' and a 'CAD' option.
- Quantity available:** A text input field.
- Minimum per order:** A text input field.
- Maximum per order:** A text input field.
- Advanced - Availability Settings:** A section with several toggle options:
 - Ask for first name
 - Ask for maiden name
 - Ask for last name
 - Display quantity remaining to purchase
 - Display time remaining to purchase
 - Display who is coming for this ticket
- Image:** A file upload area with a 'Choose File' button and the text 'No file chosen'.
- Description:** A rich text editor with a toolbar containing options for undo, redo, font face, size, paragraph style, bold, italic, underline, link, unlink, text color, and background color. The text area is currently empty.

At the bottom of the form, there is a footer that reads 'Press Alt+0 for help' and '0 words Build with tinyMCE'.

Step 3: Enter Ticket Details

Fill in the following information:

- **Ticket Name:** Give your ticket a clear, descriptive name (e.g., 'Early Bird Registration', 'VIP Access', 'General Admission')
 - **Description:** Add details about what's included with this ticket
 - **Type:** Select whether you are selling tickets, items, T-shirts, or others.
 - **Price:** Set the ticket price (or \$0 for free tickets)
 - **Quantity Available:** Set the number of tickets available for purchase. (leave blank for unlimited).
 - **Advanced Settings** include a date range for when you want a ticket to be available and when to hide the ticket from the public. Enter the date range starting from when the ticket should become available for purchase to when it should no longer be available.
-

Step 4: Configure Advanced Options

Customize additional settings:

- **Minimum/Maximum Per Order:** Control how many tickets each person can buy
 - **Display Options:** Choose whether to show remaining tickets, time remaining, or who's coming
 - **Fee Settings:** Configure who pays transaction fees (buyer or organizer)
 - **Privacy:** Set ticket visibility to display the names of ticket buyers or keep them hidden (public, private, or hidden)
-

Step 5: Add Custom Questions (Optional)

If you need to collect specific information from ticket buyers, you can add custom questions to this ticket. See our guide on '[How to Add Custom Questions to Tickets](#)' for more details.

Step 6: Save and Publish

Review all settings and click '**Save**' to create your ticket.

Your event must be "published" for tickets to be visible to attendees.

Tips for Success

- Create early bird tickets with lower prices to encourage early registration
- Use clear, descriptive names that explain the ticket's benefits
- Set appropriate quantity limits to manage capacity
- Consider creating multiple ticket tiers (Regular, VIP, etc.) to offer options
- Test your ticket purchase flow before launching your event

Need to Delete a Ticket?

You can delete an existing ticket type at any time. However, please note that any transactions associated with that ticket cannot be removed automatically.

For example, tickets that have already been purchased will still have their transaction records saved. If needed, these transactions must be archived manually.

To delete a ticket, go to **Site Builder > Features > Tickets**, then click the red delete icon next to the ticket you'd like to remove.

Please note that any related purchases will remain active.

If you need to remove a ticket from your e-commerce ticket list, you can archive the related transaction. **Please note that archiving a transaction does not issue a refund.**

If a refund is required, only the buyer can issue a refund request, and only the support team can issue it. The site owner cannot process a refund.
